

- ▶ POWERFUL
- ▶ UNIVERSAL
- ▶ USER-FRIENDLY

CNC LESTE

The fastest CNC Control in the world!

The Leste CNC controls series provide fast processing cycles due to specially developed interpolation chip. Our Leste CNC controls are universal and easy to use. They are simply configured with parameters of specific applications.

CNC-CONTROLS

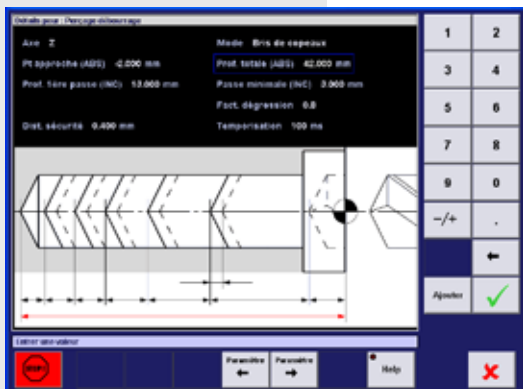

- Models with 4, 6, 8, 10 or 12 axes
- Simultan interpolation of all axes
- DHI-interpolation with 90 ns cycle time
- 32 - 64 24V in-and-outputs
- 4 analogue in-and-outputs
- 2 SER-interfaces (RS485)
- 2 RS232-interfaces
- CAN-Bus 2.0B
- Ethernet 10/100
- 4 MByte internal program memory
- Compact construction

HUMAN-MACHINE INTERFACE HMI

- Models with 10.4, 12.1 or 14 inch
- Touchscreen
- CPU 500 MHz
- 400 MB FLASH + 1 GB CF-Card
- 512 MB RAM
- Ethernet 10/100 Mbps
- RS-232 interface
- USB 2.0 interfaces

SOFTWARE AND FIRMWARE

- Parametrizable and universal software
- Simple adaptation to various applications
- Simple Programming in APD (Affolter Plaintext Dialog) or in ISO
- Machining cycles with graphical support
- Networking of several machines and centralized production management
- Possibility to personalize the application
- Simple updating via Internet with Comaff
- Training with E-Learning
